## **Subject: Application for Senior .NET Developer**

Dear Hiring Manager,

I am excited to apply for the Senior .NET Developer role. With 12+ years of overall experience and 10.5+ years of hands-on expertise, I specialize in building scalable enterprise applications using .NET Core, Web API, Angular, SQL Server, and Azure cloud services.

In my recent role at SA Tech (Client: GEP Worldwide), I have worked extensively on microservices-based architecture and high-performance APIs. I have contributed to optimizing large datasets, improving system performance, and implementing asynchronous processing using Azure Service Bus and Azure Functions. I have also streamlined deployment pipelines using Azure DevOps and Docker, ensuring zero-downtime releases.

My core strengths include system design, SOLID principles, clean architecture, and building event-driven systems. I also have strong experience with Azure services such as App Service, Blob Storage, Key Vault, and API Management, enabling secure and scalable solutions.

I am confident that my technical expertise, problem-solving skills, and ability to deliver business-critical solutions will add significant value to your engineering team. I would welcome the opportunity to discuss this further.

Thank you for your time and consideration.

Sincerely,  
Aditya Vishwakarma
